- Hospitals

What You Will Learn?

- The various types of stress
- The most common types of stress among emergency workers
- How to identify the symptoms of stress
- The different types of interventions (Pre & Post)
- You will be given the basic skills used as a CISM debriefer.

Seminar Mission

CISM: Group Crisis Intervention training program is designed to present the core elements of a comprehensive, systematic and multi-component crisis intervention curriculum.

The two day course prepares participants to understand a wide range of crisis intervention services including pre and post incident crisis education, significant other support services, on-scene support services, crisis intervention for individuals, demobilizations after large scale traumatic incidents, small group defusing and the group intervention known as Critical Incident Stress Debriefing (CISD).

The CISM: Group Crisis Intervention course specifically prepares participants to provide several of these intervention, specifically demobilizations, defusings and the CISD. The need for appropriate follow up services and referrals when necessary is also described. Considerable evidence gathered to date strongly supports the multi-component crisis intervention strategy, which is discussed in this course.

About the presenter

Carol Staben-Burroughs is a Licensed Clinical Professional Counselor in private practice in Bozeman, MT for 21 years. She is an instructor at Montana State University in the Dept of Education, Health and Human Development. Carol is a past president of the American Mental Health Counselors Association and the Montana Clinical Mental Health Counselors Association. She is a trainer for the International Critical Incident Stress Foundation and has been an active volunteer in the Montana Critical Incident Stress Management Network. Carol lectures on a wide variety of subjects and has a humorous, high-energy training style. Carol lives in Bozeman.
